GCSEs

Dangerous World

We will study anthropogenic, chemical and biological hazards and how these have impacted countries across the world

Resource Reliance

We will study the human and physical factors that affect sustainability and access to energy and food on a global scale

Geopolitics

We will study the global influence of different countries, territory, relationships and national interests

Africa

We will study the physical landscape and how historical and present factors have shaped Africa's development

Magnificent Mountains

We will study the structure of the Earth and plate tectonics developing our understanding of the planet's physical features and how we utilise them

Geographical Enquiry

We will study the purpose of geographical questioning, and how to evidence, analyse, conclude and evaluate whilst conducting local fieldwork

Hydrological Challenges

We will study the Oceans, and the variation of water usage globally, looking at the inequality of access to water

Contrasting Places

We will study how countries develop and what drives inequality on a global scale

YEAR 9

Russia

We will study the human and physical features of Russia, looking at how the topography and biomes have impacted Russia's development

Distinctive Landscapes

We will study the physical and human processes that shape our coastal, fluvial and glaciated landscapes

Shrinking Planet

We will study the impacts of Globalisation and how countries such as China and the USA are interconnected

World Cities

We will study the impact of urbanisation in cities such as Singapore, and the changing need of human consumption

YEAR 8

YEAR 7

Shaping Places

We will study the local area looking at how human and physical processes have shaped the landscape

Fragile Environments

We will study hot and cold deserts, coral reefs and low-lying islands

The Middle East

We will study the climate and topography of the region and how the need to diversify is shaping the future of the Middle East

"I wish the world was twice as big and half of it was still unexplored." - Sir David Attenborough
